

Year Range: 2025 - 2026

Current Projection: 2671.07 GWh

Solar Power Generation Chart

Solar Power Generation Data Table

Year	Predicted Production (GWh)
2025	2521.74
2026	2671.07

RECOMMENDATIONS

Based on the projected increase in solar power generation, we recommend:

- Invest in additional solar panel infrastructure to capitalize on the projected growth trend.
- Develop energy storage solutions to address intermittency challenges.
- Evaluate technological upgrades to improve solar capture efficiency.
- Consider strategic placement of new solar installations based on irradiance data.
